Summary

I am a Full-Stack Developer and MCA graduate (2022–2024) with hands-on experience building scalable web applications, real-time systems, and cloud-enabled solutions. I have worked as a Web Developer Intern and Full Stack Developer, delivering production-ready B2B and B2C applications using React, Node.js, MySQL, MongoDB, and REST APIs. During my internship, I developed 3+ full-stack applications including Invoice Management, Inventory Tracking, Expense Monitoring, and Sales Dashboards, improving UI responsiveness by 20%, API performance by 15%, and overall application efficiency by 30% through performance optimization and clean architecture design. I have experience building:

- Real-time messaging applications with audio/video calling using WebRTC & Socket.io
- Full-stack e-commerce platforms with secure authentication and payment gateway integration
- Scalable backend APIs with optimized database queries

I secured 1st place at a technical event (Swayambhu 2024) for presenting an IoT-based Smart Agriculture Project and have led multiple IoT and web development teams, ensuring timely delivery through modular and well-documented code. ☁️# I have completed structured training for AWS Cloud Practitioner, Solutions Architect, and SysOps Administrator certifications and gained practical knowledge in IAM, EC2, S3, RDS, and cloud architecture fundamentals. I am passionate about building impactful, scalable, and user-focused applications while continuously improving my system design and cloud engineering expertise. Open to opportunities in Full-Stack Development, Backend Engineering, and Cloud-based roles.

Experience

Strides Software Solutions Pvt Ltd

Web Development Intern

January 2024 - June 2024 (6 months)

Aurangabad

Web Developer Intern Jan 2024 - Jun 2024

Strides Software Solution Pvt Ltd — Onsite

Worked on backend development for both a B2C Billing Platform and a Blood Bank Management

System using Node.js, Express, and MySQL.

Designed and implemented RESTful APIs for modules including Invoice Management, Inventory

Tracking, Expense Management, Donor Registration, Blood Stock Management, and Request

Handling.

Created and tested 20+ API endpoints using Postman to validate authentication, request/response cycles, and error handling.

Optimized database queries and backend logic to improve API performance and ensure efficient data retrieval.

Integrated backend APIs with React frontend components to deliver complete full-stack functionality.

Education

MGM's Jawaharlal Nehru Engineering College

Master of Computer Applications - MCA, Information Technology · (September 2022 - June 2024)

Deogiri College Aurangabad

Bsc(Computer Science) , Computer Software Engineering · (July 2015 - July 2019)
