Summary

Perfect Adding relevant hashtags/keywords at the end will improve visibility on LinkedIn searches. Here's your updated About section with strategic tags added professionally (not too spammy, but optimized for recruiter search): About I am a Full-Stack Developer and MCA graduate (2022–2024) with hands-on experience building scalable web applications, real-time systems, and cloud-enabled solutions. I specialize in backend-driven development using Node.js, Express, MySQL, and MongoDB, while delivering responsive front-end experiences with React and modern UI libraries like MUI and ShadCN UI. During my internship, I worked extensively on backend development for a B2C Billing Platform and a Blood Bank Management System, where I designed and implemented 20+ RESTful APIs and validated them using Postman to ensure secure authentication, accurate request/response handling, and optimized performance. I contributed to full-stack integration, improving application responsiveness by 20% and API efficiency by 15%. I have built:

- A full-stack E-commerce platform with Razorpay payment gateway integration
- A real-time messaging application with audio/video calling using WebRTC & Socket.io
- A Music Player and Customer Support Dashboard with IndexedDB-based data handling

I won 1st place among 70+ teams at Swayambhu 2024 by co-developing an IoT-based Smart Agriculture System that improved irrigation efficiency by 35% and reduced water consumption by 25%. ☁️ # I have completed structured AWS training (Cloud Practitioner, Solutions Architect, SysOps Administrator) and gained practical exposure to IAM, EC2, S3, RDS, and cloud architecture fundamentals. I am passionate about designing clean, scalable backend architectures, building reliable APIs, and developing user-focused applications with production-level standards. Open to opportunities in Backend Development, Full-Stack Engineering, and Cloud-based roles. #FullStackDeveloper #BackendDeveloper #NodeJS #ReactJS #ExpressJS #MongoDB #MySQL #RESTAPI

Experience

Strides Software Solutions Pvt Ltd

Web Development Intern

January 2024 - June 2024 (6 months)

Aurangabad

Web Developer Intern Jan 2024 - Jun 2024

Strides Software Solution Pvt Ltd — Onsite

Worked on backend development for both a B2C Billing Platform and a Blood Bank Management

System using Node.js, Express, and MySQL.

Designed and implemented RESTful APIs for modules including Invoice Management, Inventory

Tracking, Expense Management, Donor Registration, Blood Stock Management, and Request

Handling.

Created and tested 20+ API endpoints using Postman to validate authentication, request/response cycles, and error handling.

Optimized database queries and backend logic to improve API performance and ensure efficient data retrieval.

Integrated backend APIs with React frontend components to deliver complete full-stack functionality.

Education

MGM's Jawaharlal Nehru Engineering College

Master of Computer Applications - MCA, Information Technology · (September 2022 - June 2024)

Deogiri College Aurangabad

Bsc(Computer Science) , Computer Software Engineering · (July 2015 - July 2019)
